

JYOTIRADITYA KHATUA

Generative AI Engineer | AI/ML Specialist

Noida, UP, India | +91 9625188029 | jyotiraditya20122004@gmail.com | github.com/Jyotir2004 | linkedin.com/in/Jyotiraditya-Khatua

PROFESSIONAL SUMMARY

Generative AI Engineer specializing in Python backend development, LLMs, RAG architectures, autonomous AI Agents, and Machine Learning. Experienced in building and deploying production-grade intelligent AI services using FastAPI, LangChain, LangGraph, OpenAI/Gemini APIs, Vector Databases (FAISS/ChromaDB), and PyTorch.

EDUCATION

Bachelor of Technology in Computer Science & Engineering (Specialization in AI & ML)

Mahatma Gandhi Mission's College of Engineering & Technology, Noida (Affiliated with AKTU) | Batch: 2022 – 2026 (Passing Year: 2026) | CGPA: 7.5

Secondary Senior School (Class XII) | Adarsh Public School (2022 – 2023)

WORK EXPERIENCE

AI/ML Engineer Trainee — Mobcoder (Noida, UP)

Mar 2026 – Present

- Developed AI-powered backend applications using Python, FastAPI, LLMs, RAG, and autonomous AI Agents.
- Built and integrated intelligent workflows using LangChain, LangGraph, OpenAI/Gemini APIs, and vector databases.

Data Science Intern — Appwars Technologies

Sep 2025 – Present

- Applied Python, SQL, Machine Learning, NLP, and Generative AI to build predictive models and analytics tools.
- Developed interactive dashboards and Streamlit applications for hands-on LLM exploration and backend APIs.

Data Analytics & Visualizations Intern — Tanvika Software

Jun 2025 – Aug 2025

- Analyzed tabular datasets using Excel and Python; crafted executive dashboards in Power BI, Matplotlib, and Seaborn.

PROJECTS

- **MedSync (AI Healthcare Assistant):** Built an AI healthcare assistant featuring medical RAG, clinical triage, and autonomous agent doctor scheduling using FastAPI, LangChain, and ChromaDB.
- **Multi-Agent AI Travel Planner:** Developed a LangGraph-based multi-agent travel planner with state-graph workflow orchestration for real-time itinerary generation.
- **AI Sentiment Analysis Suite:** Created an end-to-end NLP sentiment classification application using Python, Streamlit, and Scikit-learn for text and CSV dataset processing.
- **Face Recognition Attendance System:** Real-time face detection and attendance logging system utilizing OpenCV and Deep Neural Networks (CNN).

TECHNICAL SKILLS

- **Generative AI & Agents:** LLMs, RAG, Autonomous AI Agents, LangChain, LangGraph, LangFlow, Prompt Engineering
- **Machine Learning & Frameworks:** Python, FastAPI, Scikit-learn, PyTorch, TensorFlow, OpenCV, NLP
- **Databases & Analytics:** FAISS, ChromaDB, MySQL, SQL, Pandas, NumPy, Power BI, Streamlit
- **Developer Tools:** Git, GitHub, VS Code, Google Colab, Jupyter Notebooks

CERTIFICATIONS

- **IBM SkillsBuild:** 'Build an AI Agent' (Specialized in Agentic AI & Autonomous Systems)
- **IBM Developer Skills Network:** 'Machine Learning with Python' & 'Data Analysis & Visualization'
- **Intellipaat:** 'Python for Data Science'
