

JYOTIRADITYA KHATUA

GENERATIVE AI ENGINEER | AI/ML SPECIALIST

Noida, UP, India | +91 9625188029 | jyotiraditya20122004@gmail.com | github.com/Jyotir2004 | linkedin.com/in/Jyotiraditya-Khatua

PROFESSIONAL SUMMARY

Generative AI Engineer specializing in Python backend development, LLMs, RAG architectures, autonomous AI Agents, and Machine Learning. Experienced in architecting and deploying production-grade intelligent AI services using FastAPI, LangChain, LangGraph, OpenAI/Gemini APIs, Vector Databases (FAISS/ChromaDB), and PyTorch.

TECHNICAL SKILLS

- **Generative AI & Agents:** LLMs, RAG (Retrieval-Augmented Generation), Autonomous AI Agents, LangChain, LangGraph, LangFlow, Prompt Engineering
- **AI Frameworks & Models:** OpenAI API, Google Gemini API, GROQ, NVIDIA AI, PyTorch, TensorFlow, Scikit-learn, OpenCV
- **Backend & Systems:** Python, FastAPI, REST APIs, Microservices, AsyncIO
- **Databases & Vector Search:** Vector Databases (FAISS, ChromaDB), MySQL, SQL
- **Data Analytics & UI:** Pandas, NumPy, Matplotlib, Seaborn, Power BI, Streamlit
- **Developer Tools:** Git, GitHub, VS Code, Google Colab, Jupyter Notebooks

WORK EXPERIENCE

AI/ML Engineer Trainee — Mobcoder (Noida, UP)

March 2026 – Present

- Developed scalable AI-powered backend applications utilizing Python, FastAPI, LLMs, RAG, and autonomous AI Agents.
- Built and integrated intelligent workflows using LangChain, LangGraph, OpenAI/Gemini APIs, and vector databases for multi-step reasoning.

Data Science Intern — Appwars Technologies (Noida, UP)

August 2025 – February 2026

- Applied Python, SQL, Machine Learning, NLP, and Generative AI to build data-driven predictive models and analytics tools.
- Developed interactive analytical dashboards and Streamlit applications for hands-on LLM exploration and backend APIs.

PROJECTS

AI Healthcare Assistant (MedSync) | Python, FastAPI, LangChain, ChromaDB, LLMs

- Built an AI healthcare assistant featuring medical RAG, clinical triage, and autonomous agent doctor scheduling using FastAPI and LLMs.

Multi-Agent AI Travel Planner | Python, LangGraph, OpenAI API

- Developed a LangGraph-based multi-agent travel planner with state-graph workflow orchestration for real-time itinerary generation.

AI Sentiment Analysis Suite | Python, Streamlit, Scikit-learn, NLP

- Created an end-to-end NLP sentiment classification application using Python, Streamlit, and Scikit-learn for text and dataset processing.

Library Management System | Python, MySQL, REST API

- Developed a full-stack library management system for book, user, and transaction management.

Face Detection Attendance System | Python, OpenCV, Deep Learning

- Built a real-time face recognition attendance system using OpenCV and deep learning.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering (AI & ML)

Dr. A. P. J. Abdul Kalam Technical University (MGM College of Engineering & Tech) | Batch: 2022 – 2026 | CGPA: 7.18

Secondary Senior High School (Class XII)

Adarsh Public School | 2022 – 2023
